

The company responsible for the beginning and end of millimeter wave

Horizon Junction WAVE

(주) 에이치제이웨이브

WGIM
(Wave-Guide Injection Molded)

- ✓ 1. Broadband Improvement (500%)
- ✓ 2. Low Loss Reduction (10%)
- ✓ 3. Reduced transition loss
- ✓ 4. Wide angle Improvement (140%)
- ✓ 5. Beam Tilt with desired angle
- ✓ 6. Modularization process that can only replace
- ✓ 7. Minimize antenna performance reduction through tight interlayer adhesion
- ✓ 8. Reduce weight with plastic injection Molded instead of aluminum

Self-Driving
